## PROGRAMMING LANGUAGES

Python	Rust	C++
JavaScript	TypeScript	Dart
SQL	HTML	CSS
Java	Bash	YAML

## FRAMEWORKS & TOOLS

React.js	Next.js
Node.js	FastAPI
LangChain	LangGraph
PostgreSQL	MongoDB
Docker	Git / GitHub
Electron.js	REST APIs
RAG Pipelines	Vector DBs
Claude API	Gemini API
OpenAI API	Kafka
Neo4j	AWS / GCP
Redis	Figma

## EDUCATION

### Diploma — CSE

Amity University, Greater Noida  
2023 – Present | CGPA: 7.74

### Class X — CBSE

DPS Greater Noida | 80%

## PROFILES

[linkedin.com/in/mohit-sharma92](#)

[github.com/mohitsharma-2007](#)

## ACHIEVEMENTS

**2nd Runner-Up** Tata AI Summit Hackathon

**Top 5** Hack'o Clock, IILM

**Top 10** Galgotias International

**Top 10** Google GDG GenAI Hackathon

**E-Yantra Robotics** IIT Bombay (2025–26)

## LEADERSHIP

### Vice President

AEGIS TECH Club

Amity University, Greater Noida

## LANGUAGES

English — C2 Proficient

German — B2 Upper Intermediate

Hindi — Native

# Mohit Sharma

AI & Full-Stack Engineer | Agentic Systems Architect | ML Engineer

## PROFESSIONAL SUMMARY

Results-driven AI and full-stack engineer architecting 10+ enterprise-grade agentic systems across autonomous workflows, real-time financial intelligence, compliance automation, and multi-modal interfaces. Engineered and shipped production AI ecosystems leveraging RAG pipelines, multi-agent orchestration, and LLM APIs—delivering institutional-grade capability to lean teams. Secured podium finishes at national hackathons including Tata AI Summit and Google GDG GenAI.

## EXPERIENCE

### AI & Full-Stack Developer — Freelance

Greater Noida, Uttar Pradesh | Jan 2023 – Present

- Architected and deployed full-stack web applications and AI-powered automation tools for clients across logistics, finance, and enterprise workflows.
- Engineered multi-LLM integrations (Gemini, OpenAI, Claude) with RAG pipelines and agentic reasoning loops tailored to production client environments.
- Drove end-to-end project delivery—from Figma prototyping and system design through containerised deployment and iterative post-launch optimisation.

## PROJECTS

### Aegis-AI

Engineered AI/bot/LLM detection middleware leveraging behavioural fingerprinting and ML classification for real-time web protection.

[GitHub](#)

### TransBook

Built a GST-compliant Electron desktop app automating tax invoicing, TDS management, and compliance reporting for transport firms.

[GitHub](#)

### Aarambh — Ontology Engine

Constructed a cross-domain geopolitical intelligence terminal aggregating 134+ live sources into a Neo4j knowledge graph.

[GitHub](#) [Live](#)

### OmniIntel

Designed a real-time multi-agent financial intelligence platform ingesting live market data, SEC filings, and macro signals.

[GitHub](#) [Live](#)

### KickShaven

Shipped a full-stack e-commerce platform with AI-driven product recommendations, real-time inventory, and an optimised checkout pipeline.

[GitHub](#) [Live](#)

### AETHER

Architected an autonomous agent OS for ROS2 & CoppeliaSim on a Rust CLI + Python FastAPI + LangGraph multi-agent stack.

[GitHub](#)

### Clauselt

Developed a multi-agent legal intelligence platform enabling rapid contract review, risk scoring, and structured clause extraction.

[GitHub](#) [Live](#)

### WAAIS

Deployed a self-hosted WhatsApp AI agent integrating Gmail, Drive, and filesystem tools via a ReAct loop and OpenRouter fallback chain.

[GitHub](#) [Live](#)

### Manthan

Launched a community platform on Next.js 14 + Framer Motion with an embedded Claude-powered AI chatbot for campus knowledge sharing.
